

# CUSTOM RACESUITS

## PROBAN RACESUITS

(SFI 3.2A/1)

Proban single layer suits are designed for the economy minded racers who compete with sanctioning organizations that do not require Nomex. These suits are available in style A, B or C only. Proban suits are available in standard sizing or can be tailor fitted.

## NOMEX® RACESUITS

### NOMEX SINGLE LAYER RACESUITS (SFI 3.2A/1)

### PRO SERIES 2000 RACESUITS (SFI 3.2A/5)

Our Pro Series 2000 driver suits offer excellent comfort, superior fit and great protection. Constructed using a special combination of a woven Nomex outer shell and a Carbon/Nomex liner for increased breathability. The Pro Series suits come standard with tailor fitting, box quilting, inset ipockets and radial sleeves included.

Model	Description	U.S. Price	Cdn Price
25100	Nomex Double Layer, 1 Piece Suit	829.00	829.00
25300	Nomex Double Layer, Jacket	435.00	435.00
25400	Nomex Double Layer, Pants	435.00	435.00

### ELITE SERIES RACESUITS (SFI 3.2A/5)

Nomex Elite Series Suits use a special Sateen Nomex outer shell and a lightweight Nomex waffle knit liner. This is our lightest and most comfortable SFI 3.2A/5 to date. These Elite Series Racesuits, available in our 27 standard styles or custom designed, provide the racer with both superior breathability and maximum comfort. Base Pricing:

Model	Description	U.S. Price	Cdn Price
27100	Elite Double Layer, 1 Piece Suit	999.00	999.00
27300	Elite Double Layer, Jacket	525.00	525.00

### SFI FIRESUIT RATINGS

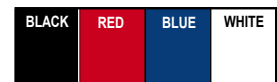

SFI 3.2A/1	3.0 seconds
SFI 3.2A/3	7.0 seconds
SFI 3.2A/5	9.5 seconds
SFI 3.2A/15	30.0 seconds
SFI 3.2A/20	40.0 seconds

The first column contains the SFI rating as shown on the tag of rated driving suits. Suits without the SFI tag may not have been tested and may not provide adequate protection. The second column gives the number of seconds the SFI rating predicts before a second-degree burn occurs. While these ratings are very accurate, situations encountered in a particular fire, such as being splashed with oil or fuel, can reduce the amount of time you are protected from injury. Also these tests were done without full fire-resistant underwear, which provides approx. 3 to 5 seconds of additional protection. Circle Track Magazine, December 1994.
